Institute of Women’s Health & Integrative Medicine

This course is suited for the practitioner who is working or wish to work with and develop their expertise in the diagnosis and treatment of menstrual disorders including amenorrhea, abnormal uterine bleeding, acute meningitis, poly cystic ovulation syndrome and PMS. The weekends focuses on the offenders developing expertise in evaluation and clinical management with natural treatment protocols including herbal and nutritional options, compounded bio-identical hormone prescriptions protocols including herbal and nutritional options, compounded bio-identical hormone prescriptions and pharmaceutical and surgical interventions. Participants will learn the indications and uses of complementary, alternative and conventional management as part of the overall goal of more integrative approach to health care.

The course is designed to give you advanced skills in order to assess, evaluate and treat menstrual disorders. Dr. Rachel Benirschke's insightful teaching method on amenorrhea will forever more make your approach to amenorrhea into a logical step-by-step evaluation with rewarding results. A practicing gynecologist, Dr. Kim Suriano brings her expertise in biochemistry and functional laboratory testing. As a result, we will gain greater understanding of the underlying causes and functional laboratory testing. As a result, we will gain greater understanding of the underlying causes and functional laboratory testing. As a result, we will gain greater understanding of the underlying causes and functional laboratory testing. As a result, we will gain greater understanding of the underlying causes and functional laboratory testing. As a result, we will gain greater understanding of the underlying causes and functional laboratory testing. As a result, we will gain greater understanding of the underlying causes and functional laboratory testing. As a result, we will gain greater understanding of the underlying causes and functional laboratory testing. As a result, we will gain greater understanding of the underlying causes and functional laboratory testing. As a result, we will gain greater understanding of the underlying causes and functional laboratory testing. As a result, we will gain greater understanding of the underlying causes and functional laboratory testing. As a result, we will gain greater understanding of the underlying causes and functional laboratory testing. As a result, we will gain greater understanding of the underlying causes and functional laboratory testing. As a result, we will gain greater understanding of the underlying causes and functional laboratory testing. As a result, we will gain greater understanding of the underlying causes and functional laboratory testing.
Day One: Friday, October 19, 2007

9:00 am - 1:00 pm  Registration and Welcome
Tori Hudson, N.D.

1:00 pm - 2:00 pm  New Approaches to Menstrual Physiology
Kara Fitzgerald, N.D.

2:00 pm - 4:00 pm  Use of Laboratory Evaluations for Treating Individuals with Complex Menstrual Disorders
Dr. Brian Thompson

5:00 pm - 7:00 pm  Dinner

Day Two: Saturday, October 20, 2007

8:00 am - 10:00 am  Poly-Cystic Ovarian Syndrome
Kara Fitzgerald, N.D. and Tori Hudson, N.D.

10:15 am - 12:00 pm  Pelvic Ultrasound: Diagnostic Evaluation and Algorithm
Kim Suriano, M.D.

1:00 pm - 2:15 pm  Abnormal Uterine Bleeding
Kim Suriano, M.D.

2:30 pm - 3:30 pm  Acute Pelvic Bleeding
Kim Suriano, M.D.

3:45 pm - 5:00 pm  Abnormal Bleeding - Botanical, Nutritional and Conventional Approaches
Kim Suriano, M.D. and Tori Hudson, N.D.

Day Three: Sunday, October 21, 2007

8:00 am - 10:00 am  Pelvic Ultrasound: Diagnostic Evaluation and Algorithm
Kim Suriano, M.D.

10:30 am - 12:00 pm  Pelvic Ultrasound: Diagnostic Evaluation and Algorithm
Kim Suriano, M.D.

1:45 pm - 3:45 pm  Pelvic Ultrasound: Diagnostic Evaluation and Algorithm
Kim Suriano, M.D.
